Thanks, for requesting the thumb nail since the extent is undefined.

Thanks for bringing this up.

Subject: RE: NPL Site thumbnail images

For TRW, can you send me an example of what a thumbnail looks like?

For I/S-C I do not want to show the Extent of Contamination. The extent of contamination is not defined and defining it is problematic (1 molecule? Less than MCLs? Less than screening values). As well, there is always some amount of professional judgement in defining the extent.

For my sites I'd like to just show the site boundary, which in NPL should be (approximately) defined by the extent of contamination, ideally as shown in the last EPA Five Year Review (if available, which it is not for I/S-C). What is the source for the I/S-C site and contamination boundaries in the EPA GIS? Note, I've reached out and asked the RWQCB as the State lead agency if they have an I/S-C site boundary as it will be good to align EPA and the State lead.

Thank you,
Michael

Subject: NPL Site thumbnail images

Hello Michael,
 Hope you're well. I was looking at your NPL sites and noticed that while the geospatial data for TRW Microwave Inc was approved, I don't believe I received a thumbnail image for it. Please send over an image as you can.

I also need you to review the site boundary and provide a thumbnail image for Intersil Inc. Thank you.
